Satellite-Derived Flood Water Extent: Cumilla District, Bangladesh
First Satellite Observation Period: 18–26 August 2024 (Copernicus Sentinel-1 SAR)

Data Sources: UNOSAT (Product 3954, Sentinel-1 SAR), geoBoundaries ADM2 (BBS / OCHA ROAP)
Observation Period Displayed: 18–26 August 2024 (First Observation Period, Peak Extent: 472.16 km²)
Comparative Window: 28 August–04 September 2024 (Second Observation Period: 453.54 km²)
Sensor Limitation: SAR radar analysis may underestimate water under dense tree canopy and in built-up urban cores.
